Waterwitch

Price List 2020

Model 101

WW 101 12V £44.29 Inc VAT

WW 101 24V £50.00 Inc VAT

Introducing the Model 101 Electronic bilge switch, available in 12 or 24V. The Model 101 offers an affordable, more reliable alternative to the ordinary mechanical float switch, not to mention the fact that installation of the 101 is a nearly effortless task. So get rid of that old, unreliable float switch and go with a switch you can trust, a product backed by 20 years of experience in the marine industry.

Model 10-12/10-24

WW 10-12V £44.29 Inc VAT

WW 10-24V £50.00 Inc VAT

Introducing the Model 10-12 (12v) or 10-24 (24V) electronic high water switch from Water Witch. The small and versatile replacement for the commonly used float switch. With all of the benefits of its predecessors, the 10-12 offers one of the easiest installations possible with its new tab design. Temperature, humidity, or electrical noise will not affect this switch, nor will this switch interfere with other electronics. Being a high water switch, this switch has different delay times than the other Water Witch bilge switches: It turns on after 4 seconds and turns off instantaneously.
