

Instruction Control Box (no encoder)

- Built in plastic with the electronics sealed in a self-extinguishing resin
- Supplied with a cable with quick coupling for the electric connections.
- The bundle of cables allows the connection to the motor, the power and to the up-down-off switch.
- Also available the wires for the buzzer and end of stroke (optionals): if not used must be insulated.
- A slow fuse of the value written on the label of the item must be inserted on the positive power line.
- When requested to replace an older version, if used as a pair, both must be replaced.

Connessioni opzionali: isolare se non utilizzati / Optional connections: insulate if not used
